Optional for
BPR 35/...

Good protection and easy maintenance

Service and maintenance covers

ECONOMIZER

for consistent compaction quality and safe operation

Cuts costs with:

- Dependable compaction quality (continuous control means no remedial costs)
- 25% less effort and cost (operator knows when it's time to stop compacting)

■ Cuts verification costs

- Optional for
- BPR 45/55 D
- BPR 50/55 D
- BPR 55/65 D
- BPR 60/65 D
- BPR 70/70 D
- BPR 100/80 D

ECONOMIZER

Procedure

- Compact the trial area
- Take reference measurements
- Compact until there are the same number of lamps displayed
- If necessary, add more passes

At the start: a few LEDs illuminated

During compaction: Increasing number of lights displayed

Maximum compaction reached: constant number of LEDs displayed

Overcompaction warning: red LED showing

Save time and money, avoid remedial work

- Saves 25% time and cost: Continue work until a constant number of lamps has been reached rather than when the plate bounces.
- Quality costs: Improve the subsoil with minimum effort before adding further layers /surface

Multi-purpose because of the options

Plastic mats to prevent damaging paving

Optional for
BPR 25/...
BPR 35/...

Challenge of paved surfaces

New requirements

- Sharp-edged pavement
- Large paving stones and slabs
- Surface treated concrete blocks

Results for paving construction

- More complaints
- Higher rate of breakage
- Less laying capacity

STONEGUARD the paving plate

For applications on paving blocks

Unique patented
solution

Product overview

STONEGUARD the paving plate

For applications on paving blocks

BPR 25/50 D
Around the house

BPR 35/60
BPR 35/60 D/H
From pavement
to car park

BPR 50/55 D
BPR 55/65 D
BPR 60/65 D
Slabs, stones
and projects on
a large scale

STONEGUARD the paving plate

Surrounding protruding edge

- Minimizes damage to objects
- Even less cases of damage.

Surrounding protruding edge

- Easier compaction right to the very last stone
- Less reworking saves time.

Optimal running behaviour and work speed

- Perfect surfaces and joints
- Greater surface capacity: faster vibratory compaction saves time.

STONEGUARD the paving plate

Effective blowing

- Less effort sweeping
- Less reworking saves time.

Larger contact area

- More efficient vibratory compaction of large formats
- Less manual reworking saves time.

Larger contact area

- Lower breakage rate
- Less edge damage: less material saves money.

Saves time during maintenance work

Operating hour meter as standard

Flexible with accessories

Water sprinkling system for smooth asphalt compaction

All necessary service parts in one box...

Service kits

Product overview

... for a long service life

Product Overview

3-2-1 warranty as a standard
for complete investment security

	3 years	2 years	1 year
BPR Reversible plate	Exciter gears + hydraulic travel lever control + ECONOMIZER	Engine	Standard warranty

TOUGH WARRANTY

the extended warranty option

TOUGH WARRANTY.

- BOMAG original parts
- BOMAG original parts + labour costs

- BOMAG original parts
- BOMAG original parts + labour costs

Safe operation in dangerous areas

Can be remote controlled

80 kN

750 kg

Radio remote control - safe and convenient

Cable/radio

Cable

Product overview

Easy to service

Excellent accessibility

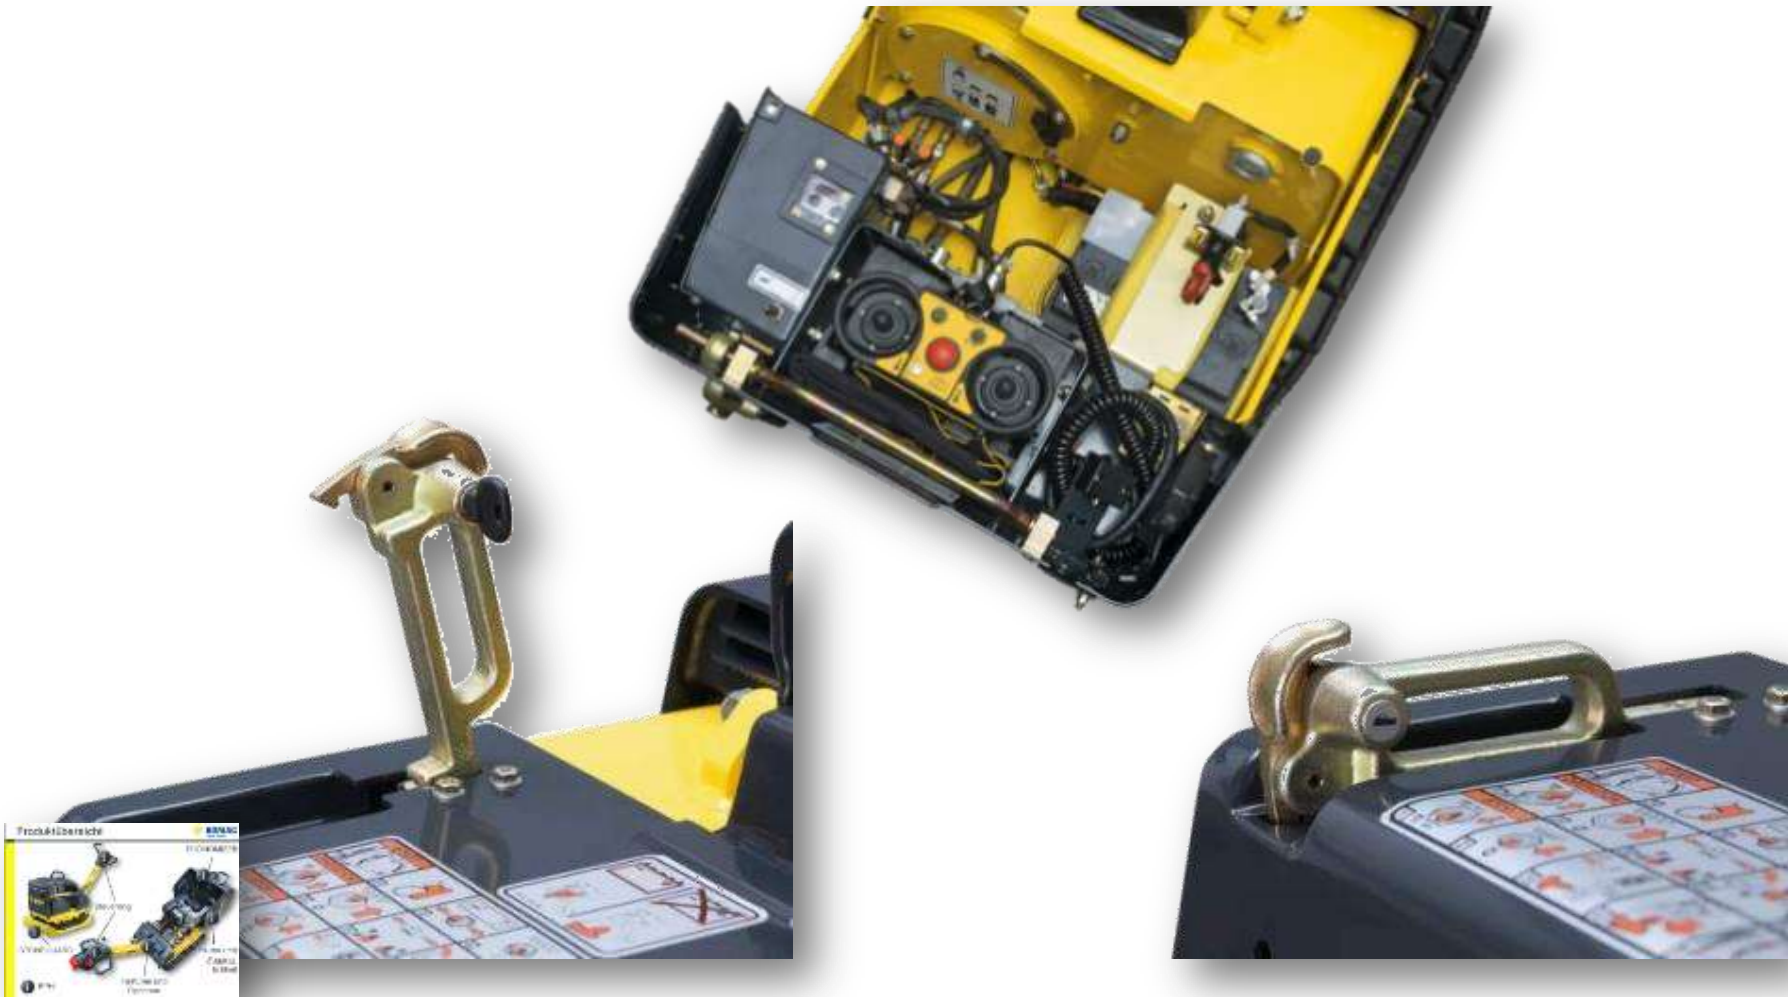

BPH – easy servicing concept

Diagnostics module with fault code display for extremely easy troubleshooting and fast rectification

BPH – lockable hood for protection against theft/vandalism
